SUMMARY

Product-focused MBA Candidate, with experience across fintech, digital customer journeys, analytics, and agile delivery. Built product experience through PRDs, user stories, acceptance criteria, A/B testing, event taxonomies, SQL validation, and cross-functional launch support. Impact includes 400% faster account creation, 40 tracking gaps identified, 50 features tested, and 20% higher app engagement.

EXPERIENCE

HapticNav | New York, NY | *Product Strategy Intern* |

September 2025 – December 2025

- Advanced 5 B2B partner conversations to the next CRM stage, contributing to 60% pipeline stage progression by translating 40 stakeholder conversations into pain-point themes, requirements, and pilot next steps.
- Built product roadmaps, prioritization matrices, pilot roadmaps, and requirements lists for enterprise haptic navigation use cases, aligning product strategy to partner needs across 5 workstreams.
- Developed product one-pagers and use-case maps for 3 pilot discussions, strengthening sector-specific pitches through product positioning, stakeholder follow-up, and implementation planning.

Odynn | New York, NY | *Product Management Intern* |

May 2025 – August 2025

- Validated 50 product features across 3 release cycles, documenting bugs, edge cases, and customer experience issues in Jira and Confluence before release.
- Built an event taxonomy for 40 missing or incorrect tracking gaps and delivered Amplitude dashboards covering 150 user events, using SQL to validate event data across booking workflows.
- Ran A/B testing and analyzed 25 competitor platforms, Google Analytics data, and support feedback to identify recurring user pain points and recommend booking-flow improvements.

Rocket Mortgage | Detroit, MI | *Digital Product Management Intern* |

May 2024 – Dec 2024

- Authored PRDs, user stories, and acceptance criteria for customer-facing product features, including a Plaid-powered account connection flow that improved account creation speed and completion time by 400% and verification accuracy by 30%.
- Coordinated with engineering and design teams to test AI chatbot flows, analyze banker escalation issues, and improve onboarding, reducing banker escalations by 40% and form completion friction by 25%.
- Led concept development for a Rocket Homes comparison feature, guiding Figma design and product demo delivery while increasing app engagement by 20% across clicks, saved homes, and session time.

Zachry Nuclear Engineering | Stonington, CT | *Mechanical Engineer* |

May 2021 – January 2023

- Assessed 1,500 turbine-building pipes during a nuclear plant upgrade, identifying 50 vibration risks and reducing potential power-uprate issues by 40% while meeting NRC guidance.
- Evaluated 10 electrical equipment additions in a 5,000 sq. ft. control room, determining a less than 2% heat-load increase to validate safe design approval.
- Led a crane modification project that increased strainer maintenance cleaning speed by 400% while meeting ASME NOG-1 standards.

PROJECTS

AI Loan Approval System (2026): Built a credit decision prototype using Python and a gradient boosting model, defining scoring inputs, validation logic, and decision workflows for financial approval use cases.

PaySecure Payment Gateway Simulator (2026): Built a Python and SQL payment simulation that tokenized account data, processed 10,000 transactions, and flagged velocity-based fraud patterns.

EDUCATION

Baruch College, Zicklin School of Business | New York, NY | *MBA Candidate* |

GPA: 4.00

The City College of New York | New York, NY | *Mechanical Engineering* |

GPA: 3.83

SKILLS

Product Management: Jira, Confluence, Asana, UAT, Agile/Scrum/Kanban, Figma, Azure DevOps, Lucid Chart, HTML/CSS.

Analytics: Amplitude, Tableau, SQL, Python, Power BI, Adobe Analytics, Excel VBA, Zendesk, Google Analytics, Jungle Scout.

Certifications: Scrum Fundamentals, Figma Learn, Notion Certified, IBM Enterprise Design, Six Sigma Yellow Belt
