EatTrack

We make healthy eating easier for everyone.

The Problem:

**Grocery stores
are dominated
by
ultra-processed
foods (UPF).**

71

%

Development Process

- Surveyed **55** adults in NYC
- Evaluated their ability to identify UPFs
- Gained an understanding of interest in our proposed solution

The Consumer Problem:

**Shoppers can't
trust what's on
the label.**

95%

of respondents expressed
uncertainty when identifying if
a product was good for them

75%

have purchased a product and
later found out it was more
processed than they expected

Solution Development:

**Consumers
want help
identifying
healthier foods.**

80%

expressed interest in a app that scan a product and tells you if the item is ultra-processed

95%

Felt it would be valuable if there was an app that suggest healthier substitutes in the same store

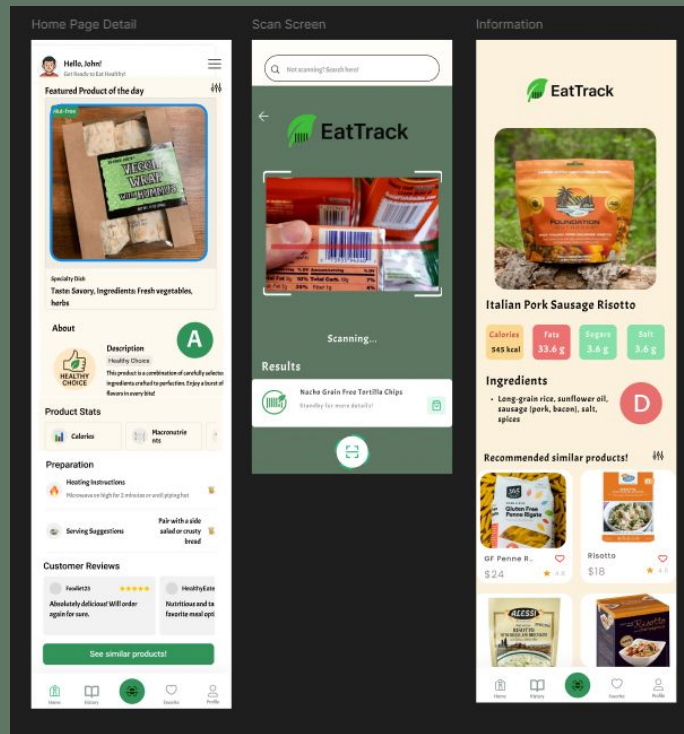

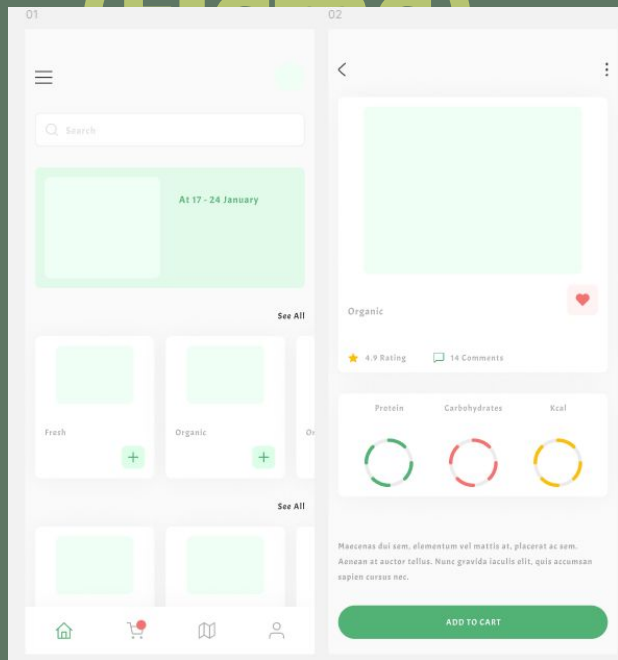

Meet EatTrack

- Scans your grocery items
- Spots ultra processed foods
- Instantly suggests smarter alternatives

Our Prototype

Validation

- Ingredient Transparency
- Healthier Alternative
- User Interface Improvements

Differentiato

r

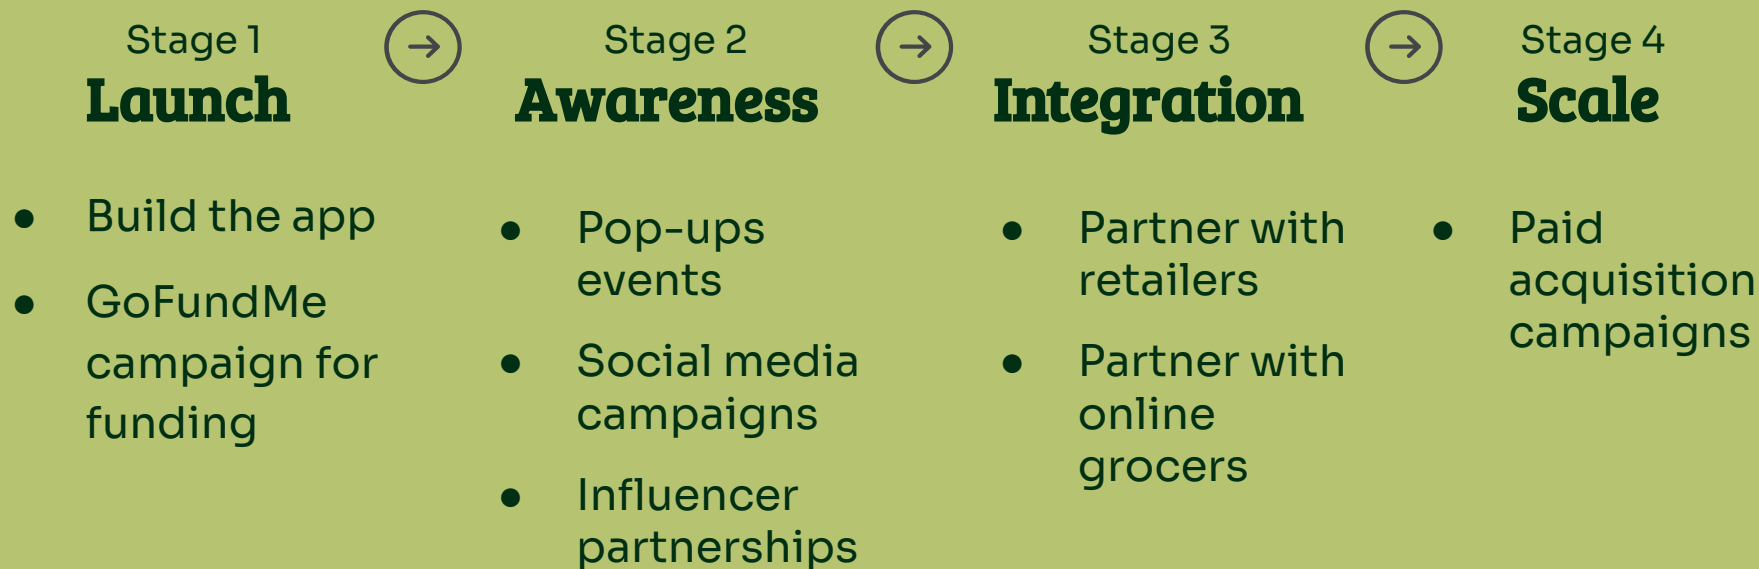

We don't just identify, we provide alternatives.

Features		
Scan and score groceries		
Instantly suggests smarter alternatives		
Keeps a history of scans		

Go-to-Market

How we are approaching the market:

Revenue

Free Tier

Free, but limited features

- ✓ Unlimited Scan
- ✓ Detailed Ingredient Review
- ✓ Product Recommendations

Premium Tier

One-time fee: \$7.99

*Includes everything in
Free Tier, plus:*

- ✓ Offline Search
- ✓ Calories & Nutrition List
- ✓ Personalized Shopping List
- ✓ Cooking Recipes

Future

*B2B Revenue
Opportunities*

1. Advertising
2. Partnerships
3. Institutional Programs

Ledger

Competitor's Market size: 70M Yuka Users

Goal: Capture 10% → **7M** → (25%) **1.75M**
EatTrack Users Premium Users
Pay \$7.99/ one-time fee

Gross revenue: **\$13,982,500**

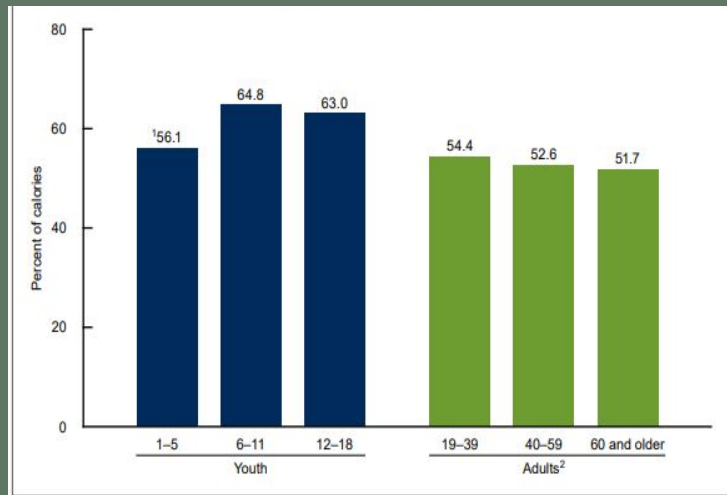

- Net revenue after app store fee (30%): \$ 9,787,750
- Operating costs (year): \$ 5,000,000

= Net profit **\$4,787,750**

Impact & Market Evidence

- **Social/Health Impact:** Consumers able to be empowered to make smarter and healthier choices with ease.
- The global barcode scanner market size reached USD **7.4 Billion** in 2024. Looking forward, IMARC Group expects the market to reach USD **13.0 Billion** by 2033.
- **Market Size:** **53%** of daily U.S. calories come from UPFs, billions of shopping decisions impacted.

Mean percentage of total calories from ultra-processed foods consumed by youth and adults, by age: United States, August 2021–August 2023

SWOT ANALYSIS

Strengths

- **Simple & Engaging UX:** Instant barcode scan with A-D health rating makes complex nutrition data easy to digest.
- **Personalized Value:** Filters for vegan, gluten-free, low-sugar, etc. + healthier alternatives with price comparisons.

Weakness

- **Database Dependence:** Accuracy and coverage depend on size/quality of product database (may lag behind big players like Yuka).
- **Monetization Uncertainty:** Free vs premium tier balance still needs validation; willingness to pay may be unclear early on.

Opportunities

- **Growing Health Awareness:** Rising consumer concern about ultra-processed foods and demand for transparency
- **Partnership Potential:** Retailers, meal kit companies, or health insurers could integrate EatTrack to promote healthier habits.

Threats

- **Strong Competitors:** Established apps (Yuka, Fooducate, CodeCheck) already have millions of users.
- **Regulatory / Data Challenges:** Food labeling rules vary by country; keeping ingredient data updated and compliant is resource-intensive.

Start-Up Cost

Total Cost:**\$5,000**

- App Development:
- Marketing:

\$ 4,500

\$ 500

Competitor

Analysis

App	Pricing	Strengths	Gaps / Weaknesses	Estimated User Base
Yuka	Freemium + subscription	Super-simple scan → health score → alternatives; massive global awareness; covers food & cosmetics	Criticism of scoring transparency; regional data gaps; some features behind paywall	~ 70M global (App Store), ~ 23M U.S. (WSJ)
Open Food Facts	Free, open source	Huge open database; Nutri-Score + NOVA + Eco-Score; community-driven	UI less polished; data quality depends on volunteers; uneven global coverage	~ 750k app installs; ~ 6M annual users
Fooducate	Freemium + Pro	Combines barcode grading, education, and diet tracking; strong longevity and brand	Many features locked behind paywall; broader focus than food scanning	~ 8M+ users (media estimates)
CodeCheck	Free tier + "Plus" subscription	Ingredient transparency, allergen & sustainability filters (microplastics, palm oil, etc.)	Free tier scan caps; stronger in EU markets than U.S.	~ 3M users
